DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, Claims 1-9 (in part), claims 33-38 (in part), 40-49 (in part) and claims 21-28 are drawn to compounds of the formula I wherein X = N.

Group II, Claims 1-9 (in part), claims 33-38 (in part), 40-49 (in part) and claims 10-20 and claim 39 are drawn to compounds of the formula I wherein X = CH.

Group III, Claims 30-32 (in part) are to drawn to pharmaceutical methods of use of compounds of the formula I where in X = N.

Group IV, Claims 30-32 (in part) are to drawn to pharmaceutical methods of use of compounds of the formula I where in X = CH.

The inventions listed as Groups 1-34 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature in all groups is the structural element aryl-alkyl-thio-alkyl-carboxylic acid. This element cannot be a special technical feature under PCT Rule 13.2 because

Art Unit: 1625

this element is shown in the prior art. Lohse et al. teach (Journal of Agricultural and Food Chemistry, 2000, 48, 5913-5923) compounds with the same structural element for use in pharmaceuticals.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction were not required; because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions

Art Unit: 1625

unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
